PROFILE

Computer Science graduate with experience developing software projects using C#, Unity, JavaScript, TypeScript, Angular, and Ionic. Skilled in programming, debugging, problem-solving, UI implementation, and building interactive systems. Seeking an entry-level software development position where I can apply my technical skills, attention to detail, and interest in creating reliable, user-focused software.

SOFTWARE PROJECTS

Word Bombardment, iOS Mobile Game — Unity Engine

Personal Project | 2024-2025

- Developed and released an iOS mobile application using Unity and C# with interactive typing-based gameplay.
- Programmed core gameplay systems including word spawning, typing validation, scoring, lives, power-ups, difficulty scaling, and game-state management.
- Implemented mobile-friendly UI, menus, and user flow for short play sessions.
- Tested and balanced application behavior to improve pacing, usability, challenge, and reliability.

CalvinRoomFinder — Ionic, Angular, TypeScript

Senior Project | Sept 2022-April 2023

- Developed a room-finding application using Ionic and Angular
- Contributed to front-end UI, routing, and application functionality
- Worked with a team to design and complete project features on schedule

WORK EXPERIENCE

Davis Dental Lab, Wyoming, MI — CAD CAM Technician I

June 2023 - Current

- Design detailed dental restorations such as splints, retainers, and mouthguards using 3Shape Dental Manager, a 3D scanning and design program.
- Use technical design software to complete precise digital models based on customer and dental office specifications.
- Work independently with minimal supervision while completing detail-oriented technical tasks
- Assist the IT department with internal computer and software issues for employees
- Troubleshoot design, software, and workflow issues to support reliable daily operations.

SKILLS

Programming: C#, JavaScript, TypeScript, CSS

Software Development: Debugging, UI implementation, object-oriented programming, application logic

Frameworks & Tools: Unity, Angular, Ionic, Visual Studio Code, Git/GitHub

Additional Experience: Technical troubleshooting, 3D design software, customer-focused problem solving

ONGOING PROJECT

2D Roguelike Space Shooter — Unity, C#

Personal Project | 2025-Present

- Developing a 2D arcade-style software project using Unity and C#.
- Programmed player movement, projectile behavior, enemy waves, upgrade selection, and boss systems.
- Built reusable gameplay systems such as object pooling, enemy roles, and upgrade logic.

EDUCATION

Calvin University, Grand Rapids, MI — Bachelor of Science in Computer Science

September 2019 - April 2023

EXTRACURRICULAR ACTIVITIES

Mary Free Bed, Grand Rapids, MI — Wheelchair Basketball

September 2017 - Present

- Developed a strong work ethic and ability to communicate and work as a team
